

GO GREEN!

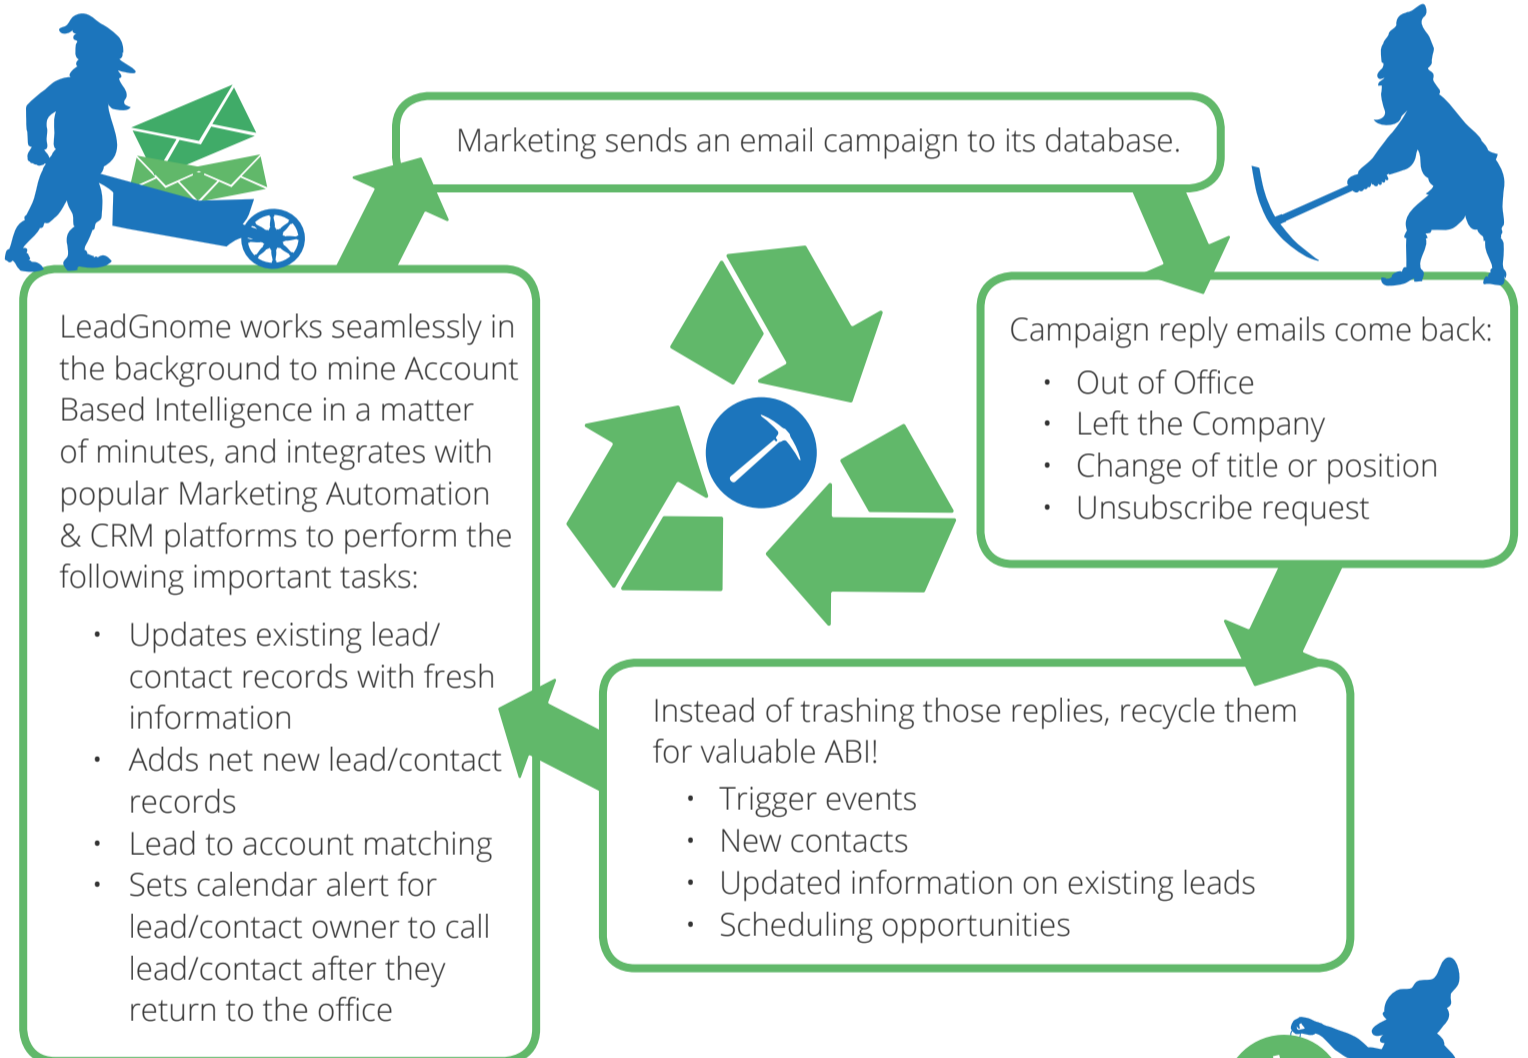

RECYCLE REPLIES INTO REVENUE

You just sent out a marketing email campaign. And now you're weeding through Out Of Office and other auto-replies clogging up your inbox. You quickly scroll through, looking for any "real" replies, then do a mass delete. If this scenario sounds familiar, you could be trashing thousands of dollars in revenue!

GO GREEN. RECYCLE THOSE CAMPAIGN REPLY EMAILS INSTEAD!

They contain golden nuggets of Account Based Intelligence (ABI), like trigger events, phone numbers, titles, when your lead will be back in the office, and even referral contacts that you can use to expand your reach into target accounts -- and ultimately *drive more revenue!*

LeadGnome's Account Based Intelligence Drives Revenue:

Existing Leads: Append and cleanse your existing leads with newly gathered information. Then send more targeted, personalized messaging with each new email campaign!

New Generated Contacts: Reach out to these new people and build rapport - remember that Gartner says you need 7 people within each account to close a deal.

Trigger Events: Leverage these gems to beat your competition and uncover new deals. With a win rate of 74%, these trigger events are good as gold.
